SUMMARY

Self-motivated and dedicated computer engineer, I am actively seeking an opportunity to apply my skills and knowledge. With a strong work ethic and ability to learn quickly, I am continuously pursuing self-improvement, fueling my passion for continuous technical development. I am eager to contribute to collaborative projects while continuously enhancing my expertise in project development.

EDUCATION

IOE, Eastern Regional Campus, Dharan

Bachelor's in Computer Engineering
November 2019 - April 2023

EXPERIENCE

Test Automation and QA – *Kreesa.com*

Dec 2021 -Feb 2023

I have gained good experience from Kreesa.com, an E-commerce company. I have worked with a professional developer to design, develop, and implement automated and manual testing procedures. Worked with tools like Apache JMeter.

Data Operation Analyst- *Straive*

Nov 2023 - July 2024

I have served as a Data Operations Analyst at Straive, contributing remotely. My responsibilities encompass Data Quality Assurance and research data management. Also, work on the PEPs research data.

Translation and software QA Freelancer | Upwork

May 2022 - Present

Involving both short-term and long-term projects related to website and software testing, and English-Nepali translation. I have managed to score a **100% job success score** with the **Rising Talent badge** on this platform.
